The System Map provides a visual representation of the international public good resources for enterprises to manage their sustainability impacts.

- The resources are broadly categorized as "principles and standards," "guidance and tools," and "indicators and metrics." They are mapped according to the System Map (IMPACT Management) (See System Map below).
- The resources have been mapped according to the key areas of focus that the Actions of Impact Management are designed to support.
- Impact management resources can be mandated by regulation, embedded in recommendations by policymakers, or voluntary in nature. The majority of resources currently represented are voluntary. Those with a policy link are indicated with an asterisk.
- The System Map is a live product. Whilst primarily encompasses the resources of the Platform Partners, the map may expand to a broader set of resources over time.

### System Map for all Enterprises

#### Colour key:
- • Resources with a primary focus on Strategy and Governance
- • Resources with a primary focus on Verification, assurance and certification and/or Benchmarking and rating
- • Resources with a primary focus on Practice (Standards, guidelines and tools, benchmarks and plans, implants, models, learn and adapt, communicate)

#### Internal actions

<table>
